

Dolphin 7600

Mobile Computer

The Dolphin 7600 device offers a range of features and functionality superior to other devices in its class. Combining the data collection and communication attributes of an industrial-grade mobile computer with a more compact design, the 7600 offers users the opportunity to deploy a powerful and reliable productivity tool.

The 7600 is perfect for the user that is constantly on the move. Its small, lightweight, and ergonomic design offers workers easy, comfortable, one-handed use as opposed to the heavy, bulky data collection devices that can cause worker fatigue and repetitive stress injuries.

To provide seamless data and voice communications, the 7600 features an integrated triple-radio design for Wireless Full Area Networking (WFAN™) technology – combining Bluetooth®, 802.11 and GSM/GPRS EDGE to provide reliable real-time information access and exchange anytime, anywhere. Full shift power management provides continuous and uninterrupted runtime, even when used in full time wireless, scan-intensive environments.

Powered by Adaptus® Imaging Technology 5.0, the 7600 delivers one of the broadest suite of advanced data capture capabilities, including linear and 2D bar code scanning, digital image capture, and intelligent signature capture, allowing users to increase efficiency and customer service.

Purpose-built for light industrial applications, the 7600 is ideal for use in retail, parcel delivery, postal, route accounting, field services, warehousing, and task management applications.
